Consequences within the AOI			
	Unit of measurement	Affected	Total in AOI
Flooded Area	km ²	5,6	5,6
Landslide	km ²	0,3	0,3
Mudflow	km ²	0,7	0,7
Estimated population	No. of inhabitants	N/A	20253
Settlements			
Residential	No.	4056	N/A
Agriculture	No.	4	N/A
Commercial	No.	48	N/A
Correctional	No.	9	N/A
Educational	No.	28	N/A
Industrial	No.	127	N/A
Institutional	No.	8	N/A
Medical	No.	0	N/A
Manufacturing	No.	8	N/A
Religious	No.	7	N/A
Transportation	No.	1	N/A
Secondary roads	km	0,9	N/A
Local roads	km	14,7	N/A

Map Information

Category 4 Hurricane Matthew is threatening the Caribbean with maximum sustained wind speed of 220 km/h and heavy rainfall. It's slowly moving northward from the Caribbean Sea and is closing in delivering potentially catastrophic floods to Haiti.

Hurricane Matthew is expected to pass very close to the western tip of the Tiburon Peninsula, which includes most of Haiti's southern coast. This event could dump up to 1 meter of rain and will likely produce life-threatening flash floods and mudslides.

The present map shows the event delineation in the area of Les Cayes (Haiti). The thematic layer has been derived from post-event satellite image using a by means of visual interpretation. The estimated geometric accuracy is 5 m CE90 or better, from native positional accuracy of the background satellite image.
