*Top portion of Mark's .pdf folder for example*

— <http://www.aprayernotebook.net/markR/>

Dear Mark,

Here's some mail LABELS printed for envelope stuffing to accompany your letters.  
 (On page 2.) Some instructions for those like you who need the introduction follows...

You can use the next page for clipping and mailing as a business card for your "website" communicating.

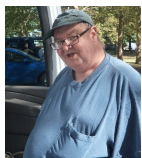

Instructions for my novice web location setup for you to use:

When people take the link their browser (see above picture for a sample) goes to an "Apache" default page in the "pdf" folder which has each title by a nomenclature I chose to use that precedes the Poem name with the date of last upload/editing: DATE: ##(Year)a(month 'a'-'l' jan-dec)# or ## for (day) then Poem's title, which may go off the column size for display purposes. You can check this with the Date column to better understand it.

If the folder has either a file ending with '.htm' or '.html', they will only see the folder contents if it is in that named browser-formatted page. Parent folders can be seen by deleting in the sub folder name {/pdf} with the slash(/) symbol. You have some other folders in the markR folder and those are indicated with the inclusion of a slash AFTER the folder name. ("daytrips/") If you have any questions as you learn you can call me at the cell phone above or David @ 860-913-8372. Happy Cyber-school Days!

In Christ,

Br. Pat
